## Notes for Contributors

The *South African Computer Journal* is an accredited specialist academic journal, publishing research articles, technical reports and communications in English in the Computer Science, Computer Systems and Information Systems domains. Its primary target is research of interest in Africa or published by African researchers, but all quality contributions are considered. All research articles submitted for publication are rigorously refereed by independent peer reviewers. The journal publishes original work that is of international stature. The editorial board comprises local and international scholars of high repute. The journal is published online using the **open access** model, making papers accessible in developing countries where funding to subscribe is scarce.

### Submissions

Authors should submit papers for publication at the web site at

<http://sacj.cs.uct.ac.za/index.php/sacj/about/submissions>

Please also check there for the latest version of the below guidelines.

### Form of Manuscript

Manuscripts for *review* should be prepared according to the following guidelines, which summarize more detailed instructions on the web site.

*SACJ* has a double-blind reviewing policy. No author's name or affiliation should appear anywhere. Citing of previous work by the author or authors should be anonymised if appropriate. Acknowledgments and thanks should not be included in the draft for review. If you use Microsoft Word please make sure that your name and affiliation are not saved in the document properties.

- The article should start as follows:
  - the title (as brief as possible)
  - an abstract of less than 200 words
  - an appropriate keyword list
  - a list of relevant Computing Review Categories (both 2012 and 1998 systems accepted)
- Tables and figures should be numbered and titled, and referenced in the text by number.
- References should be listed at the end of the text in alphabetic order of the (first) author's surname, and should be cited in the text numerically (e.g., [42]).
- if a DOI is available for any reference cited, include the DOI in the reference list

*SACJ* is produced using the L<sup>A</sup>T<sub>E</sub>X document preparation system. Though we can also accept Microsoft Word submissions, delays in publication are more likely with the latter format. While we encourage submission in a format similar to the published paper, authors should not waste undue time on layout as this will be redone by the production editor.

Authors retain the right to republish their work, subject to any republished version including a reference to the *SACJ* version.

### Publication Charges

A charge of R6000 will be levied on papers accepted for publication to cover costs of open access publication. Where the author's institution or research budget is unable to meet this charge, it may be waived upon request of the author and at the discretion of the editor.

### Proofs

Proofs of accepted papers may be sent to the corresponding author to ensure that typesetting is correct, and not for addition of new material or major amendments to the text. Corrected proofs should be returned to the production editor within three days.

### Extended Conference Papers

Authors of conference papers are welcome to submit extended papers to *SACJ* for consideration on these terms:

- a covering letter accompanying submission should explain what is added to the paper to make it worth publishing as a journal paper
- the paper includes at least 30% new material
- provide a pointer to the original paper or, if it is not freely available, upload it as supplementary material when submitting the extended paper to *SACJ*
- provide evidence that republication in this form does not violate copyright of the conference publication

### Book Reviews, Letters and Communications

Book reviews are welcome as are Letters to the editor; both should carry the author's full name and affiliation, and should be limited to 500 words. Communications and Viewpoints up to two pages in length may also reflect minor research contributions.

This category of submission is accepted at the discretion of the editor-in-chief, not refereed and does not qualify as a research publication for South African government subsidy purposes.
